Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-11, 12-18, 19-27 are rejected under 35 U.S.C 102(e) as being anticipated by McCalmont et al. (US 2003/0086539A1, hereinafter McCalmont).

Regarding claim 1, McCalmont discloses a method for availing participants in a special number call event of information contained in a plurality of data stores, the method comprising the steps of: in no particular order: providing plurality of data stores (240, 248, 252, 256, 264, fig. 2) providing at least one respective data key (for example latitude and longitude used as key to access database 252, fig. 1, paragraph: 40) and for accessing the information in each respective data store of the plurality of data stores, providing communication among the participants and plurality of data stores, identifying respective call as initiating a special number call event (see abstract), generating an identifier code (for example ESQK) for uniquely identifying the special number call event (paragraph: 0040), the identifier code including relational data, the relational data being configured for mapping on the at least one respective data key to effect accessing the information, employing communication to effect cooperation by the identifier code

Art Unit: 2614

(ESQK) with each respective data store for providing the information to the participants (paragraphs: 0020, 0043, 0052-0068).

Regarding claims 2-11, McCalmont further teaches the following: information availed by the participants during the call event is stored in association with the identifier code (paragraphs: 0040, 56-57), identifier code (ESQK) includes an indicator relating to a caller initiating the call event (paragraph: 0057), providing a plurality of data stores is effected in a subscription arrangement (paragraphs: 0009 and 0017), special number call is an emergency service call (paragraph: 0040).

Claim 12 is rejected on the same basis as claim 1.

Claims 13-18 are rejected on the same basis as claims 2-11.

Claim 19 is rejected in the same basis as claim 1.

Claims 20-27 are rejected on the same basis as claims 2-11.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
